City of Hamilton Open Data – Metadata

Dataset Name: HPS_EVENT_RESPONSE_TRANSPORT

Description: Hamilton Paramedic Services as outlined as an event, response and transports. An event is generated every time a person calls 911 and requests the assistance of a paramedic through our Central Ambulance Communication Centre. A response is the number of paramedic vehicles that are sent to an event. Transports are the total number of patients who are transported to hospital by a paramedic. Provided in Tabular Format.

Field/Attribute descriptions:

Data Set Attributes

Field Name	Data Type	Description
OBJECT_ID	Number (38,0)	Feature ID of each record
